ELOGBOOK

compliance

efficiency

technology

usability

Keeping track of records and the parameters of processes and equipment has for a long time been a pen and paper task. This approach requires a tremendous amount of sorting, inefficient time management and headaches for all firms.

Simple, easily customizable, flexible, highly scalable, and secure; e-LogBook is designed to allow its users to record, manage and track changes in all kinds of records.

Designed to replace virtually any paper logbook, eLogBook consolidates data from multiple operations and/or locations into a single secure, CFR 21, Part 11 compliant application with extensive reporting and analyzing capabilities.

eLogBook application provides functionality for configuring unlimited number of process specific log forms with simple and intuitive interface for log record data entry, review and reporting.

eLogBook can become an indispensable tool for day-to-day operations, investigations and regulatory/internal audits.

System Features

- Unlimited Number of Log Books
- User Configurable Log Forms (no programming required)
- Unlimited Number of Log Record Forms
- Remote Data Entry
- Portable (PDA) and Tablet PC Data Entry Support
- On-line Log Records Review
- Scheduling of periodic logbook entries and events
